## THE PROFESSIONAL REAR MULCHER AS AN ADDITION TO THE MU-PRO SERIES

- Rear mulcher without side shift
- Wide range of tractor horsepower input
- Large-volume housing allows trouble-free processing of large quantities of organic matter
- Large support roller offers good rolling properties and precise height control on uneven terrain
- Vario system integrated as standard

- Smooth-running rotor thanks to tool holders arranged in a spiral
- “DuraX” M-hammer flail combines durability with mulch quality
- “Shark fin” short chopping bar ensures optimum flow of material and mulching results
- Support roller for working height adjustment with robust Starinth® support roller bearing
- Rear support wheels (optional) to improve steering capability

Stable rear attachment bracket for Cat. 2 + 3

Warning signs with LED lighting equipment - with turn signal failure indicator for rear mounting incl. 5 m cable fitted

Automatic V-belt tension

Standard equipment: Large support roller

Optional: Rear support wheels with 2 x 26x10.50-12 (180 degree rotation, see transport position)
